Comprehensive Research Analysis

Market Overview

Qatar Transportation Infrastructure Construction Market Analysis by Mordor IntelligenceThe Qatar Transportation Infrastructure Construction Market size is expected to grow from USD 12.48 billion in 2025 to USD 13.12 billion in 2026 and is forecast to reach USD 16.85 billion by 2031 at 5.14% CAGR over 2026-2031. Qatar’s Third National Development Strategy and Ashghal’s unprecedented USD 22.2 billion five-year plan underpin this steady expansion, pivoting capital from World Cup legacy assets into long-term connectivity investments.[1] Robust public funding merges with rising private-sector participation, while smart-city mandates weave digital layers into physical assets, sharpening project efficiency and sustainability. Material-cost volatility and skilled-labour shortages remain cost and schedule risks, yet sovereign wealth support and green-bond financing blunt these pressures and open pathways for climate-aligned construction.

Key Market Trends

Qatar Transportation Infrastructure Construction Market Trends and InsightsDrivers Impact Analysis

Scope Of The Report

Scope and MethodologyTransport infrastructure consists of fixed installation roads, railways, airways, waterways, pipes and canals, and pipelines and terminals such as airports, railway stations, bus stations, warehouses, and trucking terminals.

The Qatar Transportation Infrastructure Construction Market is segmented by Mode (Roads, Railways, Airways, and Ports). The report offers the Qatar Transportation Infrastructure Construction Market size and forecasts in value (USD billion) for all the above segments.

Frequently Asked Questions

What is the size of Qatar’s transportation infrastructure construction mark

et in 2026?

The market is valued at USD 13.12 billion in 2026

Which segment holds the largest market share?

Roadways lead with 52.58% of market activity in 2025, supported by continuous expressway upgrades and smart-road retrofits.

Which segment is growing the fastest?

Railways post the highest growth, advancing at a 6.06% CAGR from 2026-2031 as the GCC Railway and metro extensions progress.

Which city is the fastest-growing geography?

Al Daayen records the quickest expansion with a 6.02% CAGR through 2031, driven by northern-corridor highways and the planned GCC Railway link.

What are the key growth drivers over the forecast period?

Integrated urban mobility projects, transit-oriented developments, large-scale expressway upgrades, and Hamad International Airport’s capacity expansion lift demand.

How is private investment changing the funding landscape?

While public outlays still command 75.24% of spending, private capital is growing at a 5.91% CAGR thanks to Qatar’s PPP framework and recent USD 2.5 billion green-bond issuance.
